**STEM Camden Fest Celebrates Science, Technology, Engineering, and
Mathematics Education in the Camden Community**

CAMDEN, NJ, April 27, 2024 – Camden City School District and STEM NOLA in conjunction with QCARES Foundation of New Jersey for STEM Saturday: The Physics of Sound are proud to present the STEM Saturday, a free event aimed at promoting and celebrating Science, Technology, Engineering, and Mathematics (STEM) education in the Camden community. The festival will be held on **Saturday, April 1, from 9:00AM to 12:00PM at Morgan Village Middle School located at 990 Morgan Blvd, Camden, NJ.**

Students will build and test their own musical instruments or Bluetooth speakers at this event. The event is designed to teach participants about frequency, vibration, and sound waves. By the end of the event, students will understand how these concepts allow instruments and speakers to create sound.

Members of the media are invited to attend the STEM Camden and are welcome to cover the event. Interviews with event organizers, educators, and participants will be available upon request.

What: STEM Camden – Free event featuring Build And Test Your Own BLUETOOTH SPEAKER

Where: Morgan Village Middle School (990 Morgan Blvd, Camden, NJ)

When: Saturday, April 27, 2024, from 9:00 AM (kick-off) to 12:30 PM
