Camden City School District to Host Grades 3 Through 12 STEAM Fair

FULL STEAM AHEAD WITH 21ST CENTURY INNOVATION

Camden, NJ – The Camden City School District is excited to announce the upcoming STEAM Fair, set to take place on June 13, 2024, from 10:00 AM to 2:00 PM at the Morgan Village Middle School (MVMS) gymnasium. This event will showcase the creativity and innovation of students in grades 3 through 12 as they present their projects in Science, Technology, Engineering, Arts, and Mathematics (STEAM).

The theme for this year's fair, "FULL STEAM AHEAD WITH 21ST CENTURY INNOVATION," highlights the district's commitment to preparing students for the future by integrating STEAM education into the curriculum. Attendees will have the opportunity to explore a wide range of projects that demonstrate students' problem-solving skills, creativity, and technological proficiency.

The fair will feature interactive exhibits, hands-on activities, and demonstrations that reflect the diverse talents of our students. Community members, parents, and local businesses are invited to join us in celebrating the achievements of our young innovators and supporting their educational journey.
