### **Holtec Donation of 1,000 Coats to Camden City School District**

**Camden** – Holtec is helping keep children warm this winter by donating nearly 1,000 winter coats to the Camden City School District. The Camden County Police Department is assisting us by helping deliver the coats to Camden City Schools. The donation will take place at Veteran’s Memorial Family School, 800 N. 26<sup>th</sup> Street, Camden, NJ 08105 on Friday, November 15, 2024 at 12:00 PM EST. Please email [c.serrano@holtec.com](mailto:c.serrano@holtec.com) with any questions.

###

**About Holtec International:** Holtec International is a privately held technology company with operation centers around the world. Holtec has played a preeminent role since the 1980s by expanding wet spent fuel storage capacity at over 110 reactor units in the U.S. and abroad. Over 145 nuclear units worldwide rely on Holtec’s technology for spent fuel storage and transportation. In 2017, Holtec moved its corporate engineering offices and a state-of-the-art manufacturing facility to Camden, New Jersey on the Delaware River Waterfront. The manufacturing facility houses world-class tools and equipment that employ robotics, automation, and digitally savvy lean technologies. The addition of this facility, Holtec’s third U.S. manufacturing plant, brings Holtec’s total manufacturing floor space to nearly 1.5 million square feet. The three plants collectively provide capabilities to sculpt large forgings and castings into precision components that are unrivaled in North America. Holtec’s fabrication capabilities can be deployed to extrude, roll, form, weld, machine and finish precision custom parts for the entire range of industries that need them: military, aerospace, nuclear, pharmaceutical, chemical, petrochemical, to name a few.
